

Referencing the proposed ban on business-to-business fax transmissions.

I appreciate that you postponed the implementation of the ban. Please drop the idea completely. This is a situation where the government steps into a situation and makes it worse. There is no need to protect my business and me from another business. In order to comply I would have to have filing cabinets filled with forms to legally communicate with customers that have bought from me monthly for years and depend on the fax machine for their information about our product, catalog changes and price changes.

This regulation would create a paperwork nightmare for all small business that just makes it harder to do business, create jobs and pay taxes.

Please repeal the regulation.
